Art Unit: 1647

RESPONSE TO AMENDMENT

Applicant's amendment filed June 25, 2004 is acknowledged. Claim 37 has been canceled. Claims 28-36 are amended. Claims 28-36 and 38-40 are pending and under consideration. The text of those sections of Title 35, U.S. Code, not included in this action can be found in a prior office action.

The declarations filed on June 25, 2004 under 37 CFR 1.131 have been considered but are ineffective to overcome the Jacobs *et al.* (2003/0096951) reference. A declaration filed under 37 CFR 1.131 must be signed by all of the inventors of the subject matter of the rejected claims. The declarations filed on June 25, 2004 were only signed by William Wood and Audrey Goddard.

Priority

Based on the information given by the Applicants and an inspection of the patent applications, the examiner has concluded that the subject matter defined in this application is supported by the disclosures in application serial nos. PCT/US00/04342, filed February 18, 2000 and PCT/US99/28313, filed November 30, 1999. Accordingly, the subject matter defined in claims 28-36 and 38-40 has an effective filing date of November 30, 1999.

Claim Rejections/Objections Withdrawn

The objection to the specification regarding the use of trademarks is withdrawn in response to Applicants' amendments to the specification.

The rejection of claims 28-33, 37, 39, and 40 under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention is withdrawn in response to Applicants' amendment to the claims removing the limitation that the encoded protein comprise an "extracellular domain...lacking its associated signal peptide." The rejection of claim 37 is withdrawn in response to Applicants' cancellation of claim 37.

Application/Control Number: 10/006,130

Art Unit: 1647

The rejection of claims 28-32, 39, and 40 under 35 U.S.C. 112, first paragraph, for lack of enablement, is withdrawn in response to Applicants' amendments to the claims reciting a functional limitation for the claimed polypeptides.

The rejection of claims 28-32, 39, and 40 under 35 U.S.C. 112, first paragraph, for lack of written description is withdrawn in response to Applicants' amendments to the claims reciting a functional limitation for the claimed polypeptides.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 28-36 and 38-40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are drawn to polypeptides "capable" of stimulating endothelial cell growth or "capable" of inducing proliferation of kidney mesangial cells. By saying that the polypeptides are "capable" of stimulating endothelial cell growth or "capable" of inducing proliferation of kidney mesangial cells, Applicants imply that there would be conditions under which the polypeptides would not stimulate endothelial cell growth or induce proliferation of kidney mesangial cells. If the claims were meant to encompass conditions under which the polypeptides did not stimulate endothelial cell growth or induce proliferation of kidney mesangial cells, one of skill in the art would not know how to use the claimed polypeptides under such conditions. The rejection could be obviated by amending the claims so that they are drawn to isolated polypeptides wherein the "polypeptide stimulates endothelial cell growth or the polypeptide induces proliferation of kidney mesangial cells".

Art Unit: 1647

Claim Rejections - 35 USC § 102

Page 4

The rejection of claims 28-36 and 38-40 under 35 U.S.C. 102(e) as being anticipated by U.S. Patent Application Publication 2003/0096951 (Jacobs *et al.*) is maintained for reasons of record on p. 6 of the previous office action. The rejection of claim 37 is withdrawn in response to Applicants' cancellation of the claim. As stated above, the declaration submitted on June 25, 2004 is ineffective because it was not signed by all of the inventors of the rejected claims. Thus, the declaration cannot be considered as evidence. 2003/0096951 teaches SEQ ID NO: 4, which is 100% identical to SEQ ID NO: 130, and the publication also teaches fusion proteins comprising SEQ ID NO: 4 and the Fc portion of an immunoglobulin or an epitope tag. Thus, claims 28-36 and 38-40 are anticipated by U.S. Patent Application Publication 2003/0096951.

Conclusion

NO CLAIMS ARE ALLOWED.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
